+254 117 648 948

Note:

All features and pricing shown in this quotation are indicative and subject to change. Final specifications, costs, and deliverables may vary based on your requirements, special requests, or market conditions. For a personalized quotation tailored to your exact needs, please contact us via the email or phone listed above.

ITEM

TOTAL <From KSh>

<FIXES>

1.

Broken dynamic content rendering

Resolve frontend-backend data flow issues affecting dynamic framework websites functionality.

- Fix API data not displaying
- Repair failed fetch/axios requests
- Restore broken dynamic components

2,500 per affected section

2.

API integration issues

Troubleshoot and restore external or internal API integrations for dynamic framework websites.

- Fix broken endpoints
- Correct request/response mismatches
- Resolve authentication token issues

3,500 per issue

3.

Database query errors

Fix backend query issues affecting data retrieval, storage, or processing.

- Resolve SQL/NoSQL query errors
- Repair incorrect data mapping
- Fix relational data conflicts

3,000 per issue

	ITEM	TOTAL <From KSh>
4.	<p>Authentication and authorization issues</p> <p>Resolve login, registration, and role-based access problems securely.</p> <hr/> <ul style="list-style-type: none">• Fix login failures• Repair session/token handling• Correct role permission conflicts	3,500 per issue
5.	<p>Backend logic malfunction</p> <p>Repair server-side logic errors affecting workflows and system functionality.</p> <hr/> <ul style="list-style-type: none">• Conditional logic bugs• Workflow breakdowns• Business rule conflicts	3,500 per issue
6.	<p>Server or environment configuration issues</p> <p>Resolve backend hosting, environment variable, or deployment misconfigurations.</p> <hr/> <ul style="list-style-type: none">• Fix environment variable conflicts• Repair server configuration errors• Restore broken deployment setups	4,000 per issue
7.	<p>Minor security vulnerabilities</p> <p>Patch backend and API vulnerabilities protecting dynamic framework applications.</p> <hr/> <ul style="list-style-type: none">• Secure exposed endpoints• Fix improper validation• Remove unsafe code patterns	5,000 per issue
8.	<p>Malware or system compromise cleanup</p> <p>Restore integrity of dynamic framework applications after file or server compromise.</p> <hr/> <ul style="list-style-type: none">• Clean infected files• Restore backend codebase• Harden server configuration	8,000 per issue

<ENVIRONMENT UPDATES & ENHANCEMENTS>

9. Routine Updates (Framework and dependency updates)

Update frontend and backend frameworks, create backup instances after updates ensuring future compatibility and long-term stability.

- Update frontend framework
- Upgrade backend framework
- Update npm/pip/composer dependencies
- Resolve breaking changes
- Post-update Backup

Note: We recommend routine Updates at least once every year, preferably quarterly (every 3 months), However monthly routine updates can be applied for mission critical and high security applications.

4,500 per complete update cycle

10. Application & Database Snapshot Recovery

Structured backups of application code, configurations, and active databases.

- Full Application Backup (Code + Database): From KSh 6,500 per backup cycle
- Rollback Deployment: From KSh 9,000 per restoration instance

Note: If TechWorks is contracted to develop your website, the initial system snapshot is provided as part of the development/maintenance service.

15,500 for complete Rollback

11. Database optimization

Improve dynamic framework database performance and query efficiency.

- Optimize indexes
- Refactor heavy queries
- Improve relational structures

4,000 per optimization

12. Image & Performance optimization

Improve dynamic framework application speed, Image load speed, API efficiency, and frontend performance.

- Reduce API response time
- Optimize server processing
- Improve frontend load performance
- Image Optimization: From KSh 50 per image

1,500 per page

	ITEM	TOTAL <From KSh>
13.	Content updates Update text, images, and dynamic sections within framework-based applications. <hr/> <ul style="list-style-type: none">• Text replacements• Image swaps• Minor dynamic content edits	1,500 per page/section
14.	Minor UI refinements Improve frontend interface components, layouts, and interactive elements in dynamic applications. <hr/> <ul style="list-style-type: none">• Button and form styling• Layout adjustments• Minor UX refinements	2,000 per task
15.	Adding new dynamic pages Develop and integrate new dynamic pages with backend connectivity. <hr/> <ul style="list-style-type: none">• Create frontend structure• Connect to backend APIs• Configure routing and validation	2,500 per page
16.	Adding dynamic modules or features Implement new backend-connected features or functional modules in framework applications. <hr/> <ul style="list-style-type: none">• Add API-connected components• Implement new workflows• Extend database logic	6,500 per module
